

REMARKS

Claims 1, 7, 10, 14, 16, and 18-25 have been amended. Applicant respectfully requests reconsideration in light of the amendments and following remarks. Claims 1-25 are pending.

Discussion of Objections to the Claims

Claims 1, 7, 10, 14, and 22-25 are objected to because of certain informalities. Applicant respectfully submits that the claims have been amended and do not contain informalities. Accordingly, Applicant respectfully requests withdrawal of the objections.

Discussion of Claims Rejected under 35 U.S.C. § 101

Claims 22-25 are rejected under 35 U.S.C § 101 as being directed to non-statutory subject matter. Applicant respectfully submits that Claims 22-25 have been amended and are directed to statutory subject matter. Accordingly, Applicant respectfully requests withdrawal of the rejections.

Discussion of Claims Rejected under 35 U.S.C. § 102(a)

Claims 1-3, 9, 14-16, 18-22, 24, and 25 are rejected under 35 U.S.C § 102(a) as being anticipated by Soliman *et al.* ("Hierarchical Mobile IPv6 mobility management (HMIPv6)"). Soliman discusses Hierarchical mobility management to reduce the amount of signaling between a mobile node, its Home Agent, and correspondent nodes. See abstract.

Applicant respectfully submits that the cited art does not disclose individually or collectively the combination of elements recited in Claim 1, as amended. For example, the cited art does not disclose a method of operating a network entity, the method comprising: "allocating a secondary care of address to the network entity."

Accordingly, at least for these reasons, Applicant respectfully submits that Claim 1 overcomes the cited art and is, therefore, in condition for allowance. In addition, Applicant respectfully submits that Claim 14 is also in condition for allowance at least because of reasons similar to those discussed above with regard to Claim 1. In addition, Applicant does not necessarily agree with the characterization and assessments of the art with respect to the dependent claims, and respectfully submits that the dependent claims are in condition for

allowance at least because of the features they include from the independent claims from which they depend and because of their own features.

Discussion of Claims Rejected under 35 U.S.C. § 103(a)

Claims 4-8, 10-13, 17, and 23 are rejected under 35 U.S.C § 102(a) as being unpatentable over Soliman in view of one or more of Aura (U.S. Patent Pub. No. 2005/0041634) and Jung (U.S. Patent Pub. No. 2002/0015396).

Claims 4-8 depend from Claim 1 and Claim 17 depends from Claim 14. Therefore, Applicant respectfully submits that because the additional art does not show at least the features discussed above, Claims 4-8 and 17 are also in condition for allowance at least because of the features they include from Claims 1 and 14 and because of their own features.

Applicant respectfully submits that the cited art does not disclose individually or collectively the combination of elements recited in Claim 10, as amended. For example, the cited art does not disclose at least those features discussed above with regard to Claim 1 and Soliman. Accordingly, at least for these reasons, Applicant respectfully submits that Claim 10 overcomes the cited art and is, therefore, in condition for allowance. In addition, Applicant does not necessarily agree with the characterization and assessments of the art with respect to the dependent claims, and respectfully submits that the dependent claims are in condition for allowance at least because of the features they include from the independent claims from which they depend and because of their own features.
